

Whirlpool Series

FunPool®

PHÂRO®

A fine childhood memory: a birthday party in the park by the lake, forgetting time and just enjoying games and laughter. Bare feet that play with the water and never want to stop. A day like this leaves little left to desire except the true highlight of the day: taking a bath in FunPool®.

At the end of an active day the last thing you want to do is read the instructions for relaxing. The pleasing design of the FunPool® family of tubs brings harmony, whilst innovation makes life simple. Technology comes to the aid of wellbeing and the generous proportions invite to a meeting that you will never want to end: a meeting between you and moving water.

A simple action and FunPool is ready to do what you have asked. The extremely simple functions guide you towards wellbeing. Just press a button and relax.

FunPool presents a completely new control to achieve wellbeing: Poolmaster Basic. Turning the whirlpool off and on is mere child's play. With AirMix technology, even adjusting the mixture of air and water for a gentler massage can be regulated by a simple turn.

For those who seek additional features such as underwater lighting or interval control, two additional control systems are available: The rim-mounted Poolmaster Mini or Poolmaster remote control, which is totally waterproof and floats like a boat should it fall into the water.

FunPool welcomes you with all comforts. Rest your head on a soft cushion made of a unique water-resistant material created to give added comfort to your moments of relaxation. Position it anywhere you like.

In today's hectic lives moments of reflection and tranquillity are hard to find. After immersing yourself in the relaxing waters of FunPool®, you cannot help but feel at one with yourself and nature. Embrace the world around you with a free and open mind, just the way you have always wanted.
